

# Time Saving Tools for Teachers

Here are a few of my favorite AI tools to get started with. If you would like to find even more, visit the site [“There’s an AI for That”](#) to find more.

1

**ChatGPT**

## Chat GPT

Digital Assistant to answer any question. Ask for story starters, word banks, vocabulary terms, sentence starters, class jokes, riddles, real world connections, help writing emails, comments and feedback, scoring writing, class celebration ideas, playlists for work time, planning a feild trip and more

2

*Canva*

## Canva

Totally Free and completely editable... Create presentations, whiteboards, worksheets, flashcards, practice pages, class decor, name placards premade lessons and units and even text to image to make class even more fun.,

3

**MAGIC SCHOOL**

## Magic School

This tool does it all. Create instant choice boards, grading rubrics, letters of recommendation, vocabulary lists, examples of topics in the real world, scaffolding, changing text level and so much more.

4

*Diffit*  
For Teachers

## Diffit

Fantastic tool to differentiate for students. Using any link, document, website or video, Diffit will create custom content, worksheets, activities, vocabulary, comprehension questions and more.

5

**school**

## School AI

Another great AI tool that will build lessons, units, activities, interactive chatbots and more at the touch of a button
