**4J Wi-Fi for iPod, iPhone and iPad**

**Note:** This configuration should only be used on devices that are assigned to one single person. Illustrations are from an iPod touch, but are applicable to all iOS devices.

1. Tap the **Settings** icon, then **Wi-Fi**.
2. If **Wi-Fi** is set to **OFF** toggle the switch to turn it **ON**.
3. Tap the name of the **4jwireless** network to connect.
4. You will be prompted with the Aruba login page. Enter your username and password and tap the **Go** button.

5. Push the button just below the iPod’s screen to exit.
6. Tap the **Safari** icon. If a list of **Bookmarks** or **History** appears, just click the **Done** button to dismiss it.
7. In the address field, type **ns.lane.edu** and tap **Go**.
8. In the left sidebar, tap the link called **Wireless**.
9. In the next page that loads, tap the link called Apple iPhone/iPad/iPod Wireless Configuration File.

10. On the following screen click the **Install** button.
11. Click **Install Now** when prompted.

12. Enter your **username** when prompted and tap **Next**.
13. Enter your **password** when prompted and tap **Next**.
14. In the **Profile Installed** screen, tap **Done**.
15. Push the button below the iPod’s screen to exit.
16. Tap the **Settings** icon, then **Wi-Fi**.
17. Tap the blue arrow next to the **4jwireless** network.
18. Toggle **Auto-Join** to the **OFF** position.
19. Tap **4jauth** to join this network instead.

20. Push the button just below the iPod’s screen to exit.

Your device will now automatically log into wireless and the Internet in any building where the **4jauth** network is available.
