

Lesson 7 Summary Graphing Activity

You will be using the information in these tables to construct a graph of how the pounds of apples are related to the cost.

Dollars Per Pound—Think, what questions could we answer?

Apples (pounds)	Price (dollars)	Unit Price (dollars per pound)
2	5	
4		
	15	
	20	
a		

Pounds per dollar—What's the same? Different?

Apples (pounds)	Price (dollars)	Unit Price (pounds per dollar)
2	5	
4		
	15	
	20	
	b	

After you graph, use the GRAPH to answer the following questions. Mark on your graph how you figured it out 😊.

1. About how many pounds of apples could you buy with \$12?

2. How much would it cost to buy 5 pounds of apples?
