

You will work with a partner—you need to work together and stay at the same pace.

1. Each pair gets a ledger size sheet of paper with diagrams
2. You will work on the top half first
3. Look closely at the top 3 diagrams and explain to each other what is going on in each
4. You will receive 3 blue strips, remove from staple carefully
5. Circle the important information and underline what you're being asked to find out.
6. Match each blue strip with the one of the top 3 diagrams
7. Raise your hand and get a teacher okay to move on (be patient)
8. Using the diagram and the information on the strip work on writing multiplication and division sentences and finding an answer.
9. Get small pieces of tape and tape down (just a little) or staple.

Repeat with the lower diagrams and green strips
